This commodious Chelsea spa prides itself on privacy and comfort. "All of our treatments are without time limits and codenamed," says owner Enrique Ramirez, citing treatment titles ranging from the intense ("Crackdown") to the

ethereal ("Full Moon Rising"). From the facility's soothing music and soft lighting to the specialized waxes utilized in treatments imported from Australia imbued with essential oils, the name of Face to Face's game is definitely "personalized attention." In addition to its quirky titled individual

treatments, Face to Face offers a selection of specialized combination packages (including the "Betty Ford": a therapeutic detox—perfect after a wild, extended weekend) as well as retail services (featuring free nationwide shipping—in case you're planning a wild, extended weekend abroad) and free skincare analysis and consultation for new customers.
